

# Weekly Coal Production

Production for Week Ended:  
August 22, 1992

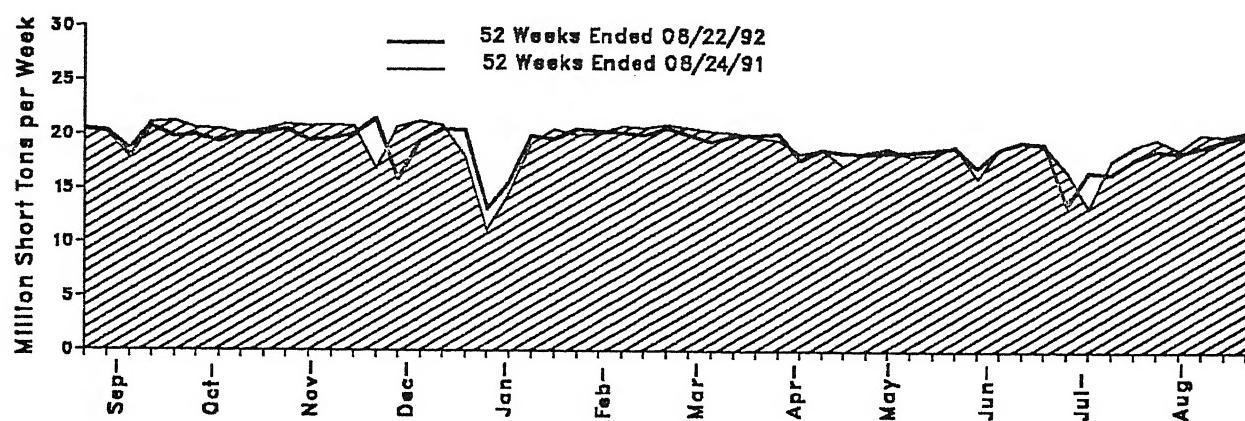

# Summary

U.S. coal production in the week ended August 22, 1992, as estimated from railroad car loadings by the Energy Information Administration, totaled 20 million short tons. This was slightly higher than in the previous week, and about the same as in the comparable week in 1991.

Production East of the Mississippi River totaled 12 million short tons, and production West of the Mississippi River totaled 9 million short tons.
